GODAE OceanView

Issue III, June 2018

GOV Symposium preparation

We are preparing for the next GODAE OceanView Symposium next year in **Halifax (6-10 May 2019)**.

End of June 2018 the GOVST Co-chairs and Programme Office are heading to Canada to visit the venue, meet with the Local Organizing Committee and discuss the event details.

This will be the first time all organizers meet in person, so should give us a big push in consolidating our effort!

Halifax, Waterfront, Canada

to have a positive impact on the salinity RMSE in two different ocean forecasting systems. Members of the GOV task teams [OSEval-TT](#) and [DA-TT](#) are specifically invited. Deadline for [abstract submissions](#) is **6 July 2018**.

NEWSLETTER

GOV will resume the publication of newsletters to inform the community about GOV plans, events, groups and science.

CALL FOR PAPERS

Two workshops are in preparation and deadlines for abstract submissions are getting close.

The 6th International Coordination meeting of the COSS-TT (ICM6), Madrid, 19-21 September 2018

This open meeting invites GOV members, coastal ocean modellers and experts interested in science & applications related to regional/coastal ocean monitoring and forecasting to meet at **Puertos del Estado** to present and discuss on four themes:

- | | |
|---|--|
| 1 | <i>General theme:</i> Science in support to coastal ocean forecasting |
| 2 | <i>OceanObs related theme:</i> Added value of observing networks in the coastal ocean continuum |
| 3 | <i>Systems theme:</i> Operational and pre-operational ocean forecasting systems |
| 4 | <i>Cross-cutting theme (link with Marine Ecosystem Analysis and Prediction Task Team):</i> Ecosystem responses to physical drivers in coastal regions |

The registration for the event is open until September.

ESA Ocean Salinity Science Conference, Paris, 6-9 November 2018

This conference features a session on “*Ocean dynamics and salinity assimilation in ocean models*” to which GOV task teams will contribute. They will present the outcome from a [GOV ESA project](#) on the “Impact of Sea Surface Salinity data assimilation on El Niño 2015/16” and will show that assimilating SSS from space (see [web-story](#)) with an appropriate bias correction is able

GOV Symposium planning

Science Programme Committee formed! The committee overseeing the development of the symposium structure, presentations, and outcomes was invited recently and is comprised of operational ocean forecasting experts, including representatives from the GOV Patrons group and GOV core group and task teams.

The **Local Organizing Committee** will meet in Halifax at the end of June 2018 to inspect the event venue, meet the local event manager and to prepare for the next step on the way to the GOV Symposium "**OceanPredict '19**".

“Informing science, industry, government, and the public’s understanding about ocean forecasting capabilities and benefits”

6-8 MAY 2019
OceanPredict '19

Advancing the Science of Ocean Prediction
GODAE OceanView and MEOPAR invite you to experience three exciting days in the world of operational oceanography. You will learn about recent advances in the field, and how ocean prediction systems have evolved. This symposium will be an opportunity for you to interact with ocean prediction experts and users, and to learn about the potential that ocean forecasting has for use by private industry, government, and the general public.
(special science forum and user engagement sessions planned for 6&10 May 2019)

Informing science, industry, government, and the public’s understanding about ocean forecasting capabilities and benefits

Promoting global and regional forecasting systems

Motivating operational oceanography research

Implementing a global network of ocean prediction systems

GOV’S NEW NAME - OceanPredict

The GOV symposium (6-10 May 2019) will mark the date after which GOV will be run under a new name – **OceanPredict** – *Advancing the Science of Ocean Prediction (The GODAE OceanView Follow-on Programme)*.

GENERAL

- **New GOVST member:** Dr Do-Seong Byun from the **Korean Hydrographic and Oceanographic Agency** will represent the operational effort of the Republic of Korea
- **COSS-TT Topical Collection 2:** The Coastal and Shelf Seas Task Team (COSS-TT) is inviting papers for a Topical Collection in Ocean Dynamics (deadline 31 October 2018)
- **GDPR** – GOV is preparing to comply with the New EU Data Protection policy – more to follow
- **GOV Patrons’ Group** – next meeting planned for June 2018

IMPORTANT INTERNATIONAL EVENTS

Upcoming event in 2018 /19 (GOV events marked orange):

2018	July	September	November
	4 th GEO Blue Planet Symposium, 4-6 July, Toulouse, France	6 th International Coordination Meeting of the COSS-TT, 19-21 September, Madrid, Spain	Ocean Salinity Science Conference, 6-9 November, Paris, France
		“25 years of Progress in Radar Altimetry” Symposium, 24-29 September, Azores, Portugal	
2019	May	June	September
	GODAE OceanView Symposium – OceanPredict '19, 6-10 May, Halifax, Canada	Operational Satellite Observations Symposium, 18-19 June, near Washington DC, USA	OceanObs '19, 16-20 September, Honolulu, USA
